ACO Compare 3.0

Holistic Single-Click View of Performance,
Trends, and Comparative Analysis of
ACOs Around the Country

Overview

The MSSP ACOs have saved Medicare over \$2 billion since their inception in 2012, but taking a close look at the past results shows that the distribution of savings is varied. Nearly 42 percent of the ACOs founded in 2012-2013 generated more savings compared to 18 percent of the 2016 starters. The newer ACOs usually need foundational work to kickstart savings and have little prior experience or learnings. On the other hand, the older players have had ample time to learn, explore improvement opportunities, and build new care management models. Advancing quality in care requires this divide to be bridged.

ACOs, whether new or old, requires an in-depth analysis of their performance across different quality metrics. Analyzing their performance to strategically move forward and succeed in the transition to value is a high priority for ACOs.

Challenges faced by ACO

Generating maximum savings with little visibility of growth areas and what holds them back is a challenge for ACOs. When it comes to maximizing their clinical and financial outcomes, the major challenges ACOs face are:

Unavailability of suitable platform to analyze performance

As quality assumes a central role in healthcare, ACOs require a unified platform which could help them measure and analyze their performance over time and bridge the gaps in care.

Lack of experience for newer ACOs

ACOs require a detailed visibility into their performance to identify the cost drivers and high-utilization factors. Keeping the national and state benchmarks in sight can assist ACOs with enhancing their performance.

An advanced tool to support ACO

ACO Compare 3.0, Innovaccer's one-of-its-kind tool, compares the ACOs around the country on multiple metrics of performance. It assembles extensively researched data and provides a transparent and holistic view of ACO performance on various cost, quality, and utilization metrics. ACO Compare 3.0 can compare up to five ACOs at once, observe their year-wise trends and performance against the state and national average. ACO Compare 3.0 assists the providers with:

Detailed Analysis

ACOs can assess their performance trends over the years to get a refined understanding of where they stand in their states and collaborate their efforts to drive network-wide improvement.

Personalized Performance Report

ACOs can closely monitor their own performance across various metrics through a personalized, easily-downloadable performance report and tap into improvement opportunities.

Performance Drivers

The tool provides a drilled-down analysis of ACO performance from an aggregate level of comparison to different levels of expenditure and utilization along with their major drivers.

Compare the Performance

Comparing up to five ACOs simultaneously, the tool provides a detailed analysis on various quality, cost, utilization measures and delivers comprehensive insights into overall, year-wise performance.

User-friendly Point-and-Click Feature

ACO Compare 3.0 provides the user with interactive dashboards along with several scatter plots and bar graphs to easily understand performance gaps and outliers- with a single click.

About Innovaccer

Innovaccer Inc. is a leading healthcare data platform company focused on delivering more efficient and effective healthcare through the use of pioneering analytics combined with transparent and accurate data. Innovaccer's aim is to simplify complex data from all points of care, streamline the information to provide key insights, and help organizations take action to realize strategic goals. Its products have been deployed across more than 500 locations with over 10,000 providers leveraging it at institutions, governmental organizations, and several corporate enterprises such as Mercy ACO, StratiFi Health, Catalyst Health Network, Osler Health Network, and PHIX HIE. Innovaccer is based in San Francisco with offices around the United States and Asia.
